MN singer Jada LaFrance was looking for a portrait style painting of herself to represent her song "Pretty Girl" which is all about self-love and women empowerment.

I hand painted this watercolor inspired from her photo and incorporated colors that represented her desire for a raw/edgy vibe.

**New Moon**  
THOUGHTS

*The moon is our guide and you are the energy!*

You cannot see the Moon at the end of this phase. It represents the beginning of a new cycle. Just like the moon, your fresh perspective aren't visible during this phase, yet. It's a mindset, that's why it is so important to begin to use your imagination. You have all the power within you! This phase is about envisioning and holding onto your vision of what the "bigger picture" is to you. Please take an hour or more to be specific with what you are visualizing by holding a gemstone crystal to connect with mother earth who gave you life to create. Remember, you are the creator of your own universe!

It's time to *listen to your intuition* and start creating something new that benefits you and the world around you.

## Black

### CRYSTALS:

- Hematite
- Obsidian
- Black Onyx
- Black Jet

Black vibrates with the frequency of the unknown, the mystery and associated with ancient wisdom. Most fear because of the rebirth, divine feminine and protection that black energy represents. Seen through fresh perspectives, the color black can mean transitions to beautiful new worlds... think of when you close your eyes and begin to meditate? You are using the darkness to transform the light into the color of your imagination. Secrets await you in the dark. *Are you seeing clearly?*

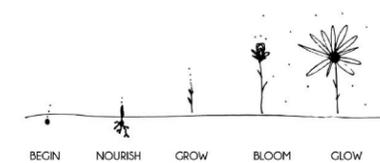

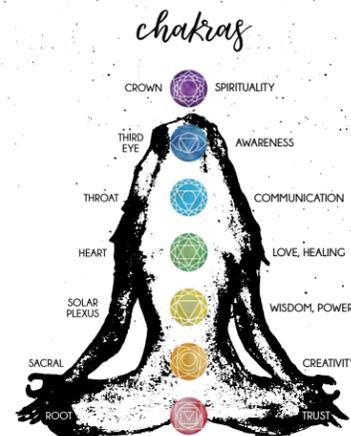

### NEW MOON rituals

- ✦ Make a list of intentions for your Vision Board
- ✦ Create spaces that are clean, cleansed & sacred to you
- ✦ Begin a new healthy habit that serves your higher self
- ✦ Schedule an activity you've never done before.
- ✦ Light a black candle to connect with this new moon phase.
- ✦ Put this year's Moon Chart in a visible area to see the dates

essential oils FOR SELF-LOVE

- White Angelica for protection
- Rose for healing love

## MOON PHASES

I've always been fascinated by the universe and everything it has to offer us! All the elements, the sun, the moon, the stars and even the planets. By understanding the moon phases, we can tap into the Divine Moon Magic. Every moon cycle lasts for 29 1/2 days. Most years we typically have 12 Full Moons, one each month. However, every now and again, sometimes we will have 13 full moons.

With the power of the moon, we can connect mentally, emotionally, spiritually with the energy to work with us.

We can transform our old energy into new energy by directing thought, energy and action to create your desired manifestation. Your reality is created by you. You have the power to choose where to begin and how to nourish your energy. You can grow through the trials and errors and bloom. If you don't bloom into a beautiful flower, you want continue to grow. Don't stop. Keep on glowing as other begin to notice how bright your inner light shines!

This planner will introduce you to the magical moon energy. The new moon has the power to show us how to begin again by increasing light in our life. The full moon marks the decreasing of light as we transition into learning how to be thankful, forgive and let go of what we do not have control over.

Let's take a look at the moon phases!

*waxing phase: increasing light*

**NEW MOON INTENTIONS** "Planting new seeds to grow." Gathering new ideas, thoughts & information

**WAXING CRESCENT MANIFESTING** Make a plan of action moving forward. Create healthy habits and plans.

**FIRST QUARTER TAKING ACTION** Following the plan of action. Focusing your attention & energy on your plan.

**WAXING GIBBOUS PATIENCE** "Keep watering your own garden." Waiting for your plan of action to come to life.

*waning phase: decreasing light*

**FULL MOON REFLECTING** Think of what plan of actions have & haven't worked for you. Celebrate them!

**WANING GIBBOUS LETTING GO** "Time to clean the weeds out of your garden." Now release what's not growing.

**LAST QUARTER FORGIVENESS** Forgiveness is love, which is our secret ingredient for moon magic.

**WANING CRESCENT HEALING** Take 3 days for self-love and listen to your inner light.

*Save the date*

### MICHAEL J. ST. MARTIN, PE Principal Civil Engineer

**PROFESSIONAL PROFILE**  
Mike St. Martin has over 25 years of experience and his passion is designing and building inspirational places. Mike's experience as a project manager on numerous housing, urban redevelopment, corporate and industrial campus projects gives him the foresight needed to create economical, accurate designs that minimize potential headaches during the construction process. He has built a solid rapport with local regulatory agencies, which allows him to effectively navigate the approval process to keep projects on schedule. He is especially adept in team-based projects focused on meeting the client's needs with a high level of service and creativity. Mike's areas of expertise include site reconnaissance, investigation for soil conditions, grading, drainage patterns, conveyance systems, street access, project compatibility, potential pollution, analysis of constructability, and LEED considerations.

### PROJECT EXPERIENCE

**Budget Rent A Car**  
Richfield, MN  
Loucks provided master site planning, civil engineering, and landscape architecture for this phased car storage and maintenance facility for Candant Car Rental Group in Richfield, Minnesota. The layout required analyzing parking and building layout while maintaining adequate vehicular movement so cars could be moved in an efficient manner. A secure point of access to the site was an important component to this site. A manned gated entrance was designed and constructed as part of the project. The project is located on the Minneapolis Airport Commission (MAC) property so the project team worked closely with the MAC to meet their design standards as well as meeting the Owners project needs.

**Anoka County**  
Maintenance Facility  
Andover, MN  
Loucks provided site design services for the addition to the Anoka County Highway Maintenance Facility, which involves expansion to their fleet service garage, truck wash and storage building. The project also involves relocation of the propane tank farm and the secure fences and gates. The additional stormwater runoff from the proposed rooftop and paving expansion will be handled with an underground storm water treatment system.

**Cummins Power Generation**  
Fridley, MN  
Loucks has been involved in a multi-phase project that started with a Master Planning effort working with the Owner and Architect. The master plan involved building and parking expansions to maximize the industrial facility while handling runoff from the large watershed. The construction projects have included: an enclosed truck loading facility, an above ground storage tank and containment system, a state of the art sound testing facility (which is the largest of its kind in the USA), and a perimeter screen wall, fencing and gate project to enhance the security and aesthetics of the site.
